

## National Reporting System for Adult Education

### **Proposed Changes for Program Year (PY) 2005**

- 1. Change Reporting for Employment Measures to Align with WIA Title I Reporting.**
  - We will change our reporting period for the employment measures to match the Department of Labor's reporting period for Title I programs. Adult education's PY 2005 reporting will remain the same, but in PY2006 employment measures will be reported again and employment will follow Title I. Survey states will need to begin surveying retained employment in all quarters.
- 2. There will be a new required table to record number and types of local grantees.**
  - This table will be similar to one that had been used in years prior to the NRS.
- 3. Status of Optional Tables.**
  - Optional Table 10 (correctional education) will become required.
